

INTERLOCKING SILT FENCE

The Interlocking Silt Fence is designed to provide a quick, durable set-up system bringing unlimited size and portability to your inlet protection needs.

Product highlights

- Galvanized 24" x 36", 36" x 36", and 48" x 36" panels
- Unlimited combinations by connecting additional panels
- Purchase individual panels to create own sizes
- Reusable—just attach silt fence material with zip ties
- Self standing and easy to transport from job to job
- Allows large filtration surface area for draining large job sites
- Adaptable to many applications and can be used with Road Drain Top Slab model or casting

616 PORTABLE SEDIMENT CONTAINMENT SYSTEM

The Road Drain Portable Sediment Containment System is simple and fast. Our containment system allows dewatering activities to be set up and moved without complicated water discharge plans.

Product highlights

- Replaceable/Reusable Filters:
Red (2-ply)
Green (3-ply)
- Hydraulic lift gate w/sealing gasket
- 2 step filter system to prevent clogging
- Typical filtration flow = 150gpm
- Roll-off or trailer mount models available
- 3" discharge hose hookup
- Low cost/reusable system
- Excellent for limited space dewatering areas
- Product weight: 4,800 lbs

Patents pending

SURPASSES TURBIDITY REQUIREMENTS!

Since 1999, contractors have chosen Wimco products for their ease and reusability. Contractors have been using the same device for more than eight years, resulting in cost benefits that amount to multiple pay units per original purchased product.

Continued performance with the contractor and compliance in mind!

U.S. Patent Number 6,609,852, 7,052,207, 7,396,471, 7,488,414
Other patents pending.

Road Drain reusable products are easy to use and prevent sediment from leaving the construction site which allows construction activity to continue in a timely manner. By developing products that are reusable, Wimco makes sediment control cost effective. We will continue to explore new ways of meeting the challenging demands of the construction industry.

ROAD DRAIN CURB AND GUTTER

Since 2001, the Road Drain Curb & Gutter from Wimco has made it easy to keep storm drains clear of silt and debris. Our patented design allows water to drain quickly in the heaviest rainfall while not interfering with pedestrian and vehicle traffic. This is what has made Wimco become a market leader in reusable inlet devices.

Product highlights

- Minimizes vehicle hazards by not allowing storm water or debris to build-up in the roadway
- Two overflows ensure heavy rainfalls exit the roadway without worry of street flooding
- One-person cleaning operation or quick use of VAC system will keep products working properly
- Visible while in place and allows vehicle traffic over casting
- Reusable and can be fabricated to fit most castings

Post Construction

- Hydrocarbon filtration available for post construction use

U.S. Patent Number 6,609,852, 7,052,207, 7,396,471 & 7,488,414
Other patents pending.

**Road Drain Top Slab
 without prefilter**

ROAD DRAIN TOP SLAB

Prior to the Road Drain Top Slab, temporary sediment control was time-consuming. The Road Drain Top Slab is the only product you need from start to finish of the pre-curb/paving operations.

Product highlights

- Can be graded around or driven over by all types of construction equipment and vehicles
- Allows for vehicle traffic up to a 20,000 lb. axle weight (OSHA standard 1910.23 and 1926.502)
- Adjusts in seconds to filter water
- Consists of a durable steel plate, drain tube and silt sock
- Fits 2' x 3' or 27" catch basins (custom sizes are also available)
- Custom name imprinting available
- RD Prefilter available for increased filtration area
