

Valve Box Insert

Designed For a Standard 5 1/4" Valve Box

Prevents debris from entering your valve box!

Clogged valve boxes will prevent access to the valve actuating nut and can lead to expensive excavating procedures! Prevent sand, dirt, road salt and other foreign materials from entering your valve box with the Valve Box Insert. Our Valve Box Insert is made of High Density Polyethylene with a minimum thickness of 60 mils. The polypropylene strap is positioned in the center for easy removal and to prevent spillage when removing.
